*By stepping into New Year 2009 our AVG has crossed one more milestone of its 100 years – a century. Initially this temple like shelter of needy has been conceptualised in the year 1919 by an advocate and a humble philanthropist late Sri Ambadas Mukhedkar with an ambition of providing shelter to orphan and poor boys with burning desire and determination to pursue higher studies. Ofcourse those were the days known for people sharing their mite for such a noble cause of uplifting needy. With the passage of time it is known fact all societal environment has undergone a sea change and in the process order of the day has emerged as accumulating the individual assets as much as possible by whatever means and deeds. Philanthropism has taken back seat otherwise replaced by commercialism. But still the AVG has been surviving and sustaining despite so many ups and downs in its journey, because of its unequivocal ambition and generosity of New Age Philanthropists (NAPsters). On the other hand year by year more number of students are knocking the door of AVG for shelter as they found the AVG is a right place to stand by them with its uncompromised system of support. During the last century hundreds of orphans and poor boys being AVGians have come out with flying colors in their studies and leading life in a manner not below to none. This all credit goes to a number of ordinary individuals those who have been guiding and guarding the AVG all along as part of their life and equally to the NAPsters who have been extending their helping hand with subscriptions and donations in cash and kind. With **New Year Greetings...** the AVG appeals more NAPsters to come forward and express their philanthropy and patronage.*

THOUGHT – TALK – HUMANITY

KEEP ON KEEPING ON

(Anitha Chopra)

In 1938 when Soichiro Honda took his 1st working sample of piston ring to Toyota, they rejected it stating that the sample was not upto their standards. Rather than focusing on the failure, he continued to work on his goal. After two years of redesigning, he finally won a contract with Toyota. He built a factor which was brought down into rubbles by an earthquake. Honda was not a man who would accept failure as a possibility. Recession is depression caused by the war had created extreme Gasoline shortage in Japan. So people resorted to and cycling. Honda designed a tiny engine and attached it to cycle. His neighbors too wanted one of those motorized cycles from him. So he built plant and manufactured his motor cycle “The super cub” which earned him the Emperors award! Today Honda Corporation employees over 1 lakh people why? Honda never considered failures as the end.

Great people become great people because of the way they dealt with failures are set backs in life. At every fall they refused to remain fallen. They refused to quit. They refused to give up. They refused to access a “NO” from life. “Their greatest glory” in the words of “never falling but rising every time they fall”.

The news paper editor hired him because he had no new ideas! A pastor employed him to draw conversing material for the church. He was allowed to stay in the mouse- infested church garage. One of the mice inspired the man so much that Mickey-Mouse was born and Walt Disney was revealed to the world. Walt Disney epitomized what Churchill preached Never, Never, Never, Never, Never give up. Chester Earlsions idea was rejected by over 20 corporations and also 7 long years of rejections. He started his own Xerox Corporation! Colons Harland D Sanders heard 1009 No's to his proposals of a food chicken recipe before he heard the first “YES” and thus the multimillion dollar RFL Corporation was born. The Ramboe we know, Sylvester's album one was rejected by over 1000 agents before he had his first break through. One of the greatest inventors by are times who went on to receive 1093 patents, more than any one in the history of the world is Thomas Alva Edison.

Even he failed 9999 times before he perfected the light bulb! Einstein's parents thought that he was mentally retorted. Steven Spielberg was placed in a special class for learning disabled! ISSAC NEWTON did barely in grade School! Beethovan's music teacher told him. “You are helpless”! Michel Tordan was dropped Francis school basket base team. Winston Churchill failed in his 6th grade. Edison's teachers told him he was too studied to learn

Many feel, but only a few can express. It is the power of expressing one's love and appreciation and sympathy for others, that enables a person to succeed better than others.

KEEP ON KEEPING ON

..... anything !!! Abraham Lincoln failed in business at the age of 21 and again at 24. He was defeated in a legislative race at the age of 22 and twice in the congress race at the age of 34 and again at the age is 36. He lost senatorial race at the age of 45 and 49. He ailed to become the vice-president of USA at the age of 47. Yes after are these failures. Abraham Lincoln went on to become the historic president of United States at the age of 52.

Failure is the Parenthesis inside which success hides, there is no sun rise with out sunset. There is no life with out death. There cannot be only success with out failures. Champions that it is better to face outstanding failures than mediocre success. Only those who are willing to persist in spite of temporary set backs, only those who would not succumb to defeats. Only those who persisted in spite of midway failures went on to write success stories.

The very fact that so many failures have finally turned into success implies that failures are not wrong. Learn from your failures and move on. Just don't give up. *Keep on keeping on.*
